-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Newly submitted claims 11-17 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 7-8 and 10 of the originally claimed invention were directed to “a soft decision-identification means for computing identification signals related to the results of identification by the plurality of deciders, and reliability information indicating a level of reliability of the identification signals” and “a control means for executing the hard decision-identification of the electronic signals by using the hard decision-decider, for measuring, based on the hard decision-identification results, the average amplitude of the electronic signals, and for correcting, based on the variation over time in the measured average amplitude, thresholds in the plurality of deciders in the soft decision-identification means”.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 11-17 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Specification

In view of the amendment filed 10/22/2007, the Examiner withdraws all prior objections.

Response to Arguments

The Applicant contends, "In particular, the features of Claim 7 are now recited in independent Claim 11".

The Examiner disagrees and asserts that "**a soft decision-identification means** for computing identification signals related to the results of identification by the plurality of deciders, and reliability information indicating a level of reliability of the identification signals" and "a control means for executing **hard decision-identification** of the electronic signals by using each of the plurality of deciders, and for correcting, based on each of the hard decision-identification results, thresholds in the plurality of deciders in the soft decision-identification means".

Allowable Subject Matter

Claim 18 is allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2112

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph D. Torres whose telephone number is (571) 272-3829. The examiner can normally be reached on M-F 8-5.
